Guus de Vries, Bas Martens : K98K Rifle (The Propaganda Photo Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised K98K Rifle (The Propaganda Photo Series):

1 of 1 people found the following review helpful. One of the top ten rifles in the history of the planet.By Walter F. BillingsThe book is Dutch and the author is Dutch. This can be noted by the nature of some of the comments by the author. If you are one to own a Mauser 98K or are interested in this ancient rifle, then this is a must book for you. Yes, the photos are great and historic. Propaganda photos they are in that they were posed, at the time, 1939-1945. However, that does not detract from the interest level of the photos. I enjoyed the book very much and only wish that it had more pages than it does.1 of 1 people found the following review helpful. good bargain with great information and picturesBy J. FrazerGreat starter book for collectors. Lots of intermediate level information and good pictures. Nothing like the books by Law or Ball, but good in it's own right. Price is right to add this to your library.

The first volume of the Propaganda Photo Series, a unique series of books on World War II small arms. Each volume covers all essential information on history development, ammunition accessories, codes markings and contains photos of nearly every model and accessory. The most important quality of the Propaganda Photo Series however, is a unique selection of original German World War II propaganda photos, most never published before. The combination of solid information and original photos makes the Propaganda Photo Series the most extensive and reliable source of German

small arms "in-use", depicting the weapons and equipment as they were actually used. This book describes and depicts the K98K rifle, the "workhorse" and most important small arm of the German armed forces during World War II. It contains a detailed description of the history, use and accessories of this rifle, but also covers the sniper rifles, rare variants and special accessories as the curved barrel device and the silencers

About the AuthorGuus de Vries is a historian, specialising in the field of firearms. Thus far, he has written fifteen books on firearms history, mostly together with Bas Martens, and numerous articles for magazines in Belgium, Germany, Finland, the Netherlands, Russia, the United Kingdom and the U.S.A.
