Yves Debay : Le Char Leopard I (Les Materials Militaire du Monde) (French Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Le Char Leopard I (Les Materials Militaire du Monde) (French Edition):

0 of 0 people found the following review helpful. Four Stars By Alden Ross colorful and informative 2 of 3 people found the following review helpful. My Copy is all in French By John Matlock With one exception this is hands down the best book available on the German Leopard I Main Battle Tank. The exception is that all of the text is in French. Back in about 1970 the Germans and the Americans decided to work together to build a new tank that was going to be the absolute state of the art. The resulting tank the MBT 70 wasn't liked by anybody. It was too heavy, too expensive, too everything. So the partnership split apart with the Americans proceeding to design the Abrams M1 and

the Germans the Leopard I. I believe that both of these tanks were heavier and more expensive than the MBT 70, but that's another story. This book is the story of the Leopard I, from its design to actual use. It covers the various models that were built to come up with the final design, the optional features that various countries have used, and finally a summary of all of the countries that have used the tank. The book is beautifully printed, with probably a couple of hundred color photographs. I wish I read French better than I do. I must say that the book I have has a different front cover than the one pictured at , but it has the same ISBN.

French Text At its peak, the Leopard 1 was considered as the best MBT in the world. It also was the symbol of the new rise of German tank industry. This book covers every nation which have used or are still servicing the Leopard 1.
