1 of 1 people found the following review helpful. This is a spiritual story of one women's battle and triumph over adversityBy Douglas R. GibsonI have an emotional tie to this story. The author is one of my siblings. Nevertheless, I believe anyone who is looking to see how spirituality, ties to family, personal resolve and faith in yourself and God and can help you deal with -- and become stronger -- from adversity and trials, can learn from this memoir. One understands that it is possible to accomplish so much while dealing with cancer, or other afflictions. I enjoyed the honest writing style, and the personal touch of including journal entries. This is a woman who can feel empathy for many of our trials,1 of 1 people found the following review helpful. I can relate.By LTI needed this book bc I too had breast cancer at 32. I did the double mastectomy and divorced a cheating husband to now facing 40 with no man and another surgery for polyp, endometriosis, and fibroid tumor. This hit home in so many ways. I want a kid but I want a husband too. I too was stepmother but after divorce I feel like I lost everything bc they never come to see me. He moved on very quickly even tried to increase my life insurance when I was diagnosed before I found out it was stage one. Yes I too found my cancer on the right breast. For all of us going through cancer friends and family are wonderful support.3 of 3 people found the following review helpful. Fascinating, heartwarming and realBy arkansasangeldocThis is a real life window into the faith, frustrstion, elevation and limitation of a woman of a particular faith with a life threatening issue.

This is a heart-warming, true story about a young woman's battle with life's challenges. In her journey, while she struggles to find the right man, she then surprisingly discovers a lump in her breast at a young age of 32, has to fight cancer, and eventually deal with infertility. She must now come to the realization that her hopes and dreams of having a large family someday has come to a screeching halt due to breast cancer treatments and being a DES baby.
