Whitman Pub. : Lincoln Cents Bicentennial Folder before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lincoln Cents Bicentennial Folder:

Provides for a sampling of major Lincoln Cent design changes, but is not comprehensive. Design has some issues. By One-Reader This folder seems a design amalgam of Whitman's H.E. Harris Co. folders with some additional design changes. The outside of the folder is plasticized and printed in multiple bright colors. The spine label is printed in non-metallic white letters, and the inside coin

descriptions are in a black font printed on a relatively light background. All features similar to Whitman's H. E. Harris Co. folders. However, this folder is considerably wider and taller than the typical Harris Co. folder. Approximately 1 1/4" wider and 1 3/4" taller. If you already have a reasonable number of other Whitman folders on the shelf, this folder will clearly stand out from the rest. This larger size was solely a design decision not necessitated by the number of coins in the folder, which is relatively less, at forty-four, than most other Whitman Lincoln cent folders. There are two pages with coin slots in this folder with twenty-two slots per page. Compare this to the Harris Co. folders for "Lincoln Cent 1941-1974" and "Lincoln Cent Starting 1975" which each have thirty slots on each of their first two pages. The folder has a third sheet which is printed on both sides and is connected to the right-side of the second page. This sheet provides a brief and primarily historical description of the design evolution of the Lincoln cent. My original folder and its replacement both arrived with the first page visibly warped outward. (i.e. a convex warp). On the original folder the bottom right corner of the plasticized cover was also slightly separated from the folder's underlying cardboard body. That is, both my copies of this folder had quality control issues. Fortunately, these types of issues are atypical of other titles from this publisher. Obviously, with only forty-four slots the folder is not inclusive. Rather it provides slots for a sampling of coins as follows: -- First Year of Issue, 1909 (two slots) -- Wheat Cent, 1909-1958 (four slots) -- World War II Cents (six slots) -- Lincoln Memorial Cent, Bronze, 1959-1962 (five slots) -- Lincoln Memorial Cent, Brass, 1962-1982 (five slots) -- Lincoln Memorial Cent, Copper-Plated Zinc, 1982-2008 (five slots) -- Lincoln Bicentennial Cents, 2009 (thirteen slots) -- "Union " Cent, 2010 (four slots) Conclusion: If you want a folder allowing for a sampling of the major style changes in the Lincoln Cent this is worth considering. Of course, a sampling of coins means it is not comprehensive, its larger size does not fit gracefully with other coin albums by the same publisher, and its binding appears susceptible to warping. In view of its storage capability compared to other folders by the same publisher and competitors, it appears slightly overpriced. I like Whitman folders, particularly their H. E. Harris label. However, in my opinion, this title does not achieve the value of other Lincoln Cent folders by this publisher. 1 of 1 people found the following review helpful.
