It is pretty small but it makes for a cute little gift.0 of 0 people found the following review helpful. Great buy.By Diane BuerkeWe bought this for my daughter's LOCH NESS MONSTER birthday party and she loved it! It made a great cake topper.1 of 1 people found the following review helpful. AwesomeBy forever oceansI'm a sucker for things like this. I love livening up my work space with little doodads that keep me from feeling despair at being kept from the sunny day outside. (Just being a little melodramatic ... just a little) But in all seriousness, this is hilarious to me. You get three pieces of a Loch Ness monster figurine with a decidedly non-threatening expression on his face, and a tie around his neck! There's also a booklet that explains the history of the Loch Ness Monster and sightings. It's fun. If you can appreciate kitsch like this, then by all means go for it!

No longer is a trip to Scotland with binoculars and video camera in tow required to catch a sighting of the fabled Loch Ness Monster—now you can stay at your desk. What's a better way to scare off annoying office guests than having a monster on your desktop? This kit comes with a Loch Ness Monster figurine that's custom-made to look like parts of the monster are submerged in your desk. Also included is a 32- page mini book of fascinating “Nessie” history.
