Nancy N Schiffer : Matchbox(r) Toys before purchasing it in order to gage whether or not it would be worth my time, and all praised Matchbox(r) Toys:

2 of 2 people found the following review helpful. Easy to Use Guide to a Heap of Matchbox Toys and Their Prices By James N Simpson Whilst certainly no comprehensive guide, (this was published in 2000 so obviously there won't be any cars from after that but important to note it actually only covers cars made up to June 1982) it still has more photographs than most of its competitors. I picked this up just to see the selection of Matchbox Toys (mostly cars) which came on the market since Lesney Products first produced them back in 1947. I was actually surprised that a book that is half the height of an A4 sheet of paper and only a little bit wider actually has more cars pictured inside it than some of the so called encyclopedias out there. It achieves this by photographing multiple cars on glass shelves fitting a lot more to a page than the encyclopedias do. This is also much handier and easy to carry than those tall heavy books as well which is an important factor if you are taking it with you as you search garage sales, flea markets and second hand dealers and want to know for sure the one being sold is the same as the one in the picture. The price guide at the end couldn't be easier to use you simply look up the page number and corresponding row to know the average price the item was going for back in 2000. I found it quite interesting that some items like a police bike that has just been repainted for three different countries police force - British, German and US (LAPD) is much more expensive with the German police force paint being that it is exactly the same motorbike and rider (although granted it does look the best of the three). This book also gives a bit of history of Lesney Products and some of the lines of Matchbox cars which was quite interesting. It also outlines the history of other toys the company made as well as the changes the company made to maximise survival when Hot Wheels entered the marketplace. There may well be more better guides out there than this one and certainly more up to date ones but if its the older cars your after then you'll find most of them photographed in here. This guide also shows Matchbox cars from different countries something other guides seem to forget Matchbox cars are sold in. Not a bad book, if you can get it for a cheap price give it a look. 2 of 3 people found the following review helpful. The Original MB Book! By Spaceman One of the very first books about MB cars (perhaps the only MB book prior is the Maurice Hammond book from 1969), I purchased this back in 1990 (my copy

is dated 1983) on a whim and it inadvertently (sic) triggered my MB collecting habit. As a previous reviewer stated, the guide contains excellent photography (some photos are slightly over exposed however) with the size of the cars larger and easier to view than the Charlie Mack MB guides which followed a few years later. While not a good variation guide (as in the Mack guides and books) this book does line up at least one mint example of most if not all Lesney MB. The book was published during the Lesney to Universal transition and some of the 1983 lineup is presented. The price guide is fairly useless but don't purchase this book for that. In my mind this is the book that started the MB collecting trend, is very well done and ahead of its time. 0 of 0 people found the following review helpful. Five Stars
By qwerty
Very useful guide.

This revised 6th edition of the classic reference features all the Matchbox die-cast metal toys made between 1947 and 1982 in color photographs with history of the manufacturers and descriptions of each toy and their variations. This is a thorough study of the subject. Enjoy finding old and new vehicles in the 1-75 Series, Models of Yesteryear, Major Packs, King Size, Skybusters, Battle Kings, Two-Packs, Sea Kings, Walt Disney and Popeye characters, Glo-Racers, and Convoy lines. The list of collector clubs connects you to fellow enthusiasts, upcoming toy shows, and new styles as they are released. The newly revised values will give you the latest reflection of the collector's market.

About the Author
Nancy Schiffer is an enthusiastic collector of die-cast toys for whom Matchbox is the greatest--really.
