Dana Johnson : Matchbox Toys 1947-2007: Identification Value Guide, 5th Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Matchbox Toys 1947-2007: Identification Value Guide, 5th Edition:

4 of 4 people found the following review helpful. Don't waste your money!By Texas ThunderI recently purchased this book online. When it arrived I eagerly started looking through it, only to be horribly disappointed. IT lists the cars by name, instead of year, model number, or anything else that makes sense. The author explained that he thought it was best as the model numbers were confusing and "only listed on the boxes and not the cars"??? Funny, most cars I have seen have the model number, and are only lacking the letter following the model. What is worse is the bulk of ones listed with photos are the newer models. In fact, I would say 90% of the listings are Superfast era and above. For the early/antique collector, this book is almost useless, and the price appraisals are hilarious! They resemble the LOL prices seen on some Ebay auction "buy it now" prices. DON'T WASTE YOUR MONEY on this book. You can find

much more useful info online by searching Matchbox 1-75. The information provided may be useful to some, but not anyone like me collecting the oldies from the 50's 60's. As far as the service, it was fine as always. 6 of 6 people found the following review helpful. Not Bad But Not As Your Sole or Primary Reference Guide By Spaceman It is a handy book to have due to the alphabetical (sic?) indexing of the cars (vice indexing by 1-75 #). For instance, if you do not have the car's MB# handy you can look it up in this book by the car name, get the MB# and then look in one of Charlie Mack's books for the details and more realistic (but dated) prices. But the book has many flaws; The author uses his own variation method (by color), there is very little Lesney coverage in the way of photos and details (if I had to guess the pictures are from the authors limited collection), unrealistically (sic?) low Lesney prices (8 dollars for a regular wheel car, give me a break), and a hugely abridged section on many other important series such as King Size, Yesteryears etc. While not for the hardcore science of cataloging your MB collection, the book does have many nice photos of late Tyco and Mattel MB cars, making it a nice book to flip through when kicking back and relaxing. Overall, for the price, its worth having but not as your sole reference guide. 0 of 0 people found the following review helpful. Five Stars By Charles Hobby Great to buy from ***** Fast to ship AAA!! Thanks

Collectors will be racing to the stores to get a copy of the fifth edition of Matchbox Toys®, 1947 to 2007. The easiest way to find a Matchbox model that matches yours is to find a book that lists them alphabetically. This latest edition does just that by incorporating all the Matchbox lines in alphabetical order by model description and cross references for models with multiple names. Featured are over 2,000 full color photos and prices representing current market values. Besides the Matchbox 1-75 series and its various spin-offs, the book also includes early Lesney models, Matchbox Major Packs, Kingsize, Models of Yesteryear, The Dinky Collection from Matchbox, Convoy, Battle Kings, Sea Kings, Skybusters, Matchbox Collectibles, Premiere Series, World Class, and much more. Also provided are product listings for many other toys marketed under the Matchbox brand name. 2008 values.

This book incorporates all the Matchbox lines in alphabetical order by model description and cross references for models with multiple names. It also provides product listings for many other toys marketed under the Matchbox name. About the Author Dana Johnson is an authority on collectible toy cars, including Matchbox, Hot Wheels, and many diecast models. His extensive personal collection includes mostly diecast models from all over the world. He has written several books: Matchbox Toys, 1947 to 2003, Toy Car Collector's Guide, and Collector's Guide to Diecast Toys Scale Models.
